

DERMATOLOGY

Update: August 2025

Hidradenitis suppurativa

Product:	Allogeneic adipose tissue adult mesenchymal stem cells
Protocol code:	HidraQureS 2020
Clinical trial phase and title:	Phase I-II Clinical Trial , single-centre, randomized, double-blind, placebo-controlled to determine the safety and efficacy of the use of allogeneic adipose tissue adult mesenchymal stem cells in the treatment of draining fistulas in patients with hidradenitis suppurativa. Status: ongoing
EUDRA/EU CT Number:	2024-516595-15-00

Basal cell carcinoma (Mohs surgery)

Product:	Keratinocytes and autologous skin fibroblasts in fibrin-agarose (PHIT)/fibrin-hyaluronic acid (PHITAH)
Protocol code:	NanoGSkinCB-2019
Clinical trial phase and title:	Phase II clinical trial evaluating the safety and efficacy of a tissue engineered autologous skin substitute reconstructive surgery for basal cell carcinoma. Status: ongoing
EUDRA/EU CT Number:	2024-515235-29-00
